

# Orkla OSINT Challenge: Dragon Con Detective Writeup

## Challenge 1: Locate Coca-Cola Freestyle Machine

### Instructions:

Find a Coca-Cola Freestyle machine near the Westin Peachtree Plaza in Atlanta, Georgia. Only the name of the restaurant or location is required.

### Answer:

**Firehouse Subs, Peachtree Center Mall**

### Tools Used:

- Google Dorking
- Google Maps
- Coca-Cola Freestyle location finder: <https://www.coca-colafreestyle.com/find-freestyle-locations/#map:atlanta%7C5%7C>

### Methodology:

Initially, I searched for Coca-Cola Freestyle machines near the client's location using Google, but only two results appeared: one was a corporate office and the other a museum. To refine the search, I used Google dorking and the official Coca-Cola Freestyle website, which allowed me to locate a nearby restaurant offering the machine.

---

## Challenge 2: Determine Secret Meet-Up Location

## Instructions:

Figure out where the subject went based on an audio clip. Only the name of the place is required.

## Hint:

Orkla: “3 words—outgoing, bongo, and skip.” These words correspond to a location.

## Answer:

**Trader Vic's, Atlanta**

## Tools Used:

- Google Dorking
- [what3words](#)

## Methodology:

The three words corresponded to a **what3words** geocoding system location. This system divides the Earth into 3m x 3m squares and assigns each a unique combination of three words. Searching the combination “//outgoing.bongo.skip” led directly to Trader Vic's in Atlanta.

## Challenge 3 & 4 : Identify Bronze Statue

## Instructions:

To the right of this picture, out of sight, there's a bronze statue. Identify the name and its designer.

## Answer:

**Ballet Olympia**

**Designer:** John C. Portman

## Tools Used:

- Reverse image search (Google)
- Google Maps
- Google dorking

## Methodology:

Atlanta has many statues, which initially caused some confusion. I combined information from the image, local events (Dragon Con parade route), and online resources to correctly identify the statue as *Ballet Olympia*. The designer was confirmed through further research.

# Challenge 5: Confirm Identity of Boston Marathon Runner

## Instructions:

An insurance company suspects a client faked a knee injury. They attended the Boston Marathon between 2013–2018. Male, late 30s, from Hong Kong. Confirm the person's name using a provided image.

## Answer:

**Peter Yuen Man Ngai**

## Tools Used:

- Google dorking
- Reverse image search / face recognition
- Marathon-specific photo database: [MarathonFoto](#)
- Event reference: [Thrillist Boston Marathon Guide](#)

## Methodology:

I performed a reverse image search on the provided image. Noticing the runner's bib and clothing year (2017), I used MarathonFoto to identify the individual. Cross-referencing multiple sources confirmed the full name.
